- 4) What is Your opinion of the young men trained and prepared here by European School of New Technologies and Tourism as well as the Foundation the Educare et Servire to work for border check in direct contact with foreign the language employer, the hotel guests in direct contact with different cultures and the morals?**

You can see that the preparation is done good, so every single person of the students has the basics to do the best out of it, of course inside everybody's own personal limits.

- 5) **You are owner of Firm which deals with complex of bringing into cultivation free time with international young personnel entertains from different countries, in Your team they work from whole Europe. The education of the students is on a very high level in comparison with Spanish workers. For sure the labor part of the work in the branch of tourism will be perfect. But important for building up an own company is the knowledge about civil rights, taxes and assurances and rest of administration.

- 6) **Staying for border from so far away from families and "strange soil" is for them the examination of maturity and responsibility as well as independence. Do they pass in your opinion this exam?**

Most of them are very responsible. Surely there're some exception, but we should not forgot that we've been all once young and did the one or other crazy thing.

- 7) **For the young people from Dębica the staying on Mallorca in character of participants of course the Hotel School is not only chance on conquest interesting contests under the foreign language professional employers' eye but also the opportunity to promoting for border our country. Always when a big group of people is staying abroad for quite a long while they represent their country. In Mallorca Polish people are well known as good hard workers who as well know how to celebrate a good party. Especially the drinking part.

- 8) If Programme Mallorca being common international initiative, EDEN Hotels and Educare et Servire, fulfils expectation in field of training our Spanish partners our listeners on Polish soil, previous in Spain practice?**

Definitely the Polish workers have a better knowledge in languages for the contact with the clients in the hotel. As well the skills in Spanish are good enough to understand and work together with other native workers in Spain
